

Vitalcloud

Cloud Based Nurse Call Reporting

Easy to use

Real-time facility status dashboard

Call logs with search & notation functions

Data analytics with charts and graphical display

Wide range of standard and customised reports

Daily performance reports emailed to management

Access anywhere on any smartphone, tablet or browser

Maintenance register for simplified compliance reporting

Vitalcare

Leaders in aged care technology

“Vitalcloud gives me the essential real-time data I need to manage my facility. And even better, I can access it anywhere from my phone, iPad or computer. It is an essential management tool that helps me do my job better” (Facility Manager)

Vitalcloud is a powerful cloud based management reporting tool for nurse call systems in aged care, independent living, low-care, high-care and hospital facilities. It provides access to real-time call status, response statistics, audit reports and systems maintenance from anywhere in the world. Vitalcloud is accessed through smartphone and tablet browser connections.

REAL-TIME DASHBOARD Critical site information can be viewed at a glance using the real-time dashboard. The status of all pendants, call points and sensors can be displayed along with outstanding calls, response times and low battery warnings.

ANALYTICS Vitalcloud includes a highly versatile reporting engine that provides facility wide performance analysis in an easy-to-read graphical format.

REPORTS All activity on the nurse call system is logged and a range of standard and customised reports are available. A search function allows management to view, print and export data relating to specific dates, times, calls or messages in the call text. Data can also be exported in a .CSV format for importing into corporate information systems, or manipulated in programs like Microsoft Excel.

MAINTENANCE & SUPPORT A maintenance module simplifies compliance and accreditation with a structured approach to testing, including providing an audit trail. System support can also be carried out remotely via internet connection. This capability dramatically reduces service travel time and associated costs.

SYSTEM MANAGEMENT A matrix of user roles can be defined within Vitalcloud's management module providing precise control of system access. The management module also includes an interactive map of the facility with identified locations for all devices.

Specifications	
System Type	Cloud based virtual environment
Browser	Safari, Chrome, Mozilla, iOS, Android
Availability	24 hours
Hosting Provider	Google
Data Security	128-bit Secure Sockets Layer (SSL)
Data Export Formats	CSV - comma separated
Reporting Integration	Vitalpager, paging, annunciators, smartphones

About Vitalcare

Vitalcare has pioneered nurse call systems for over 30 years. The company designs, manufactures, installs and services the most innovative systems available through an international network of company owned branches and authorised distributors. Vitalcare uses IoT (internet of things) technology in its two-way waterproof pendants and call points along with cloud integration for advanced reporting, supervised maintenance and data analysis. Vitalcare is the industry's most trusted brand.
